DL Week-04-CS-02

Thursday, March 5, 2026 10:04 PM

Last cs → Training Pipeline

↓

Build a NN

→ Improve

PyTorch nn modules

↓

built-in modules

→ Easy

→ Effective and Efficiently NN

Training Pipline Improvement:

1) Build NN using nn modules
2) Use built-in activation function
3) " " Loss function
4) use " optimizer

4) use " " "

nn module

torch.nn module $\xrightarrow{\text{core library}}$ PyTorch

↓ Provides

→ class and function

↓ (help)

Build NN effective and efficently

torch.nn $\xrightarrow{\text{easy}}$ creating and training NN

↓

offering built-in Layers,
Loss function, Activation Function
other utilities

↓

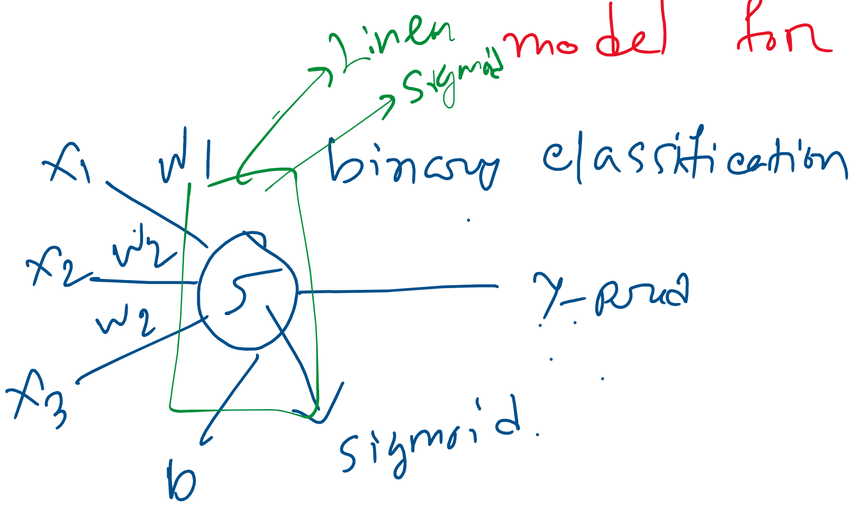
Regularization, Dropout

Regularization

↓

Overfitting (Prevent)

improve the ability of model for new data.

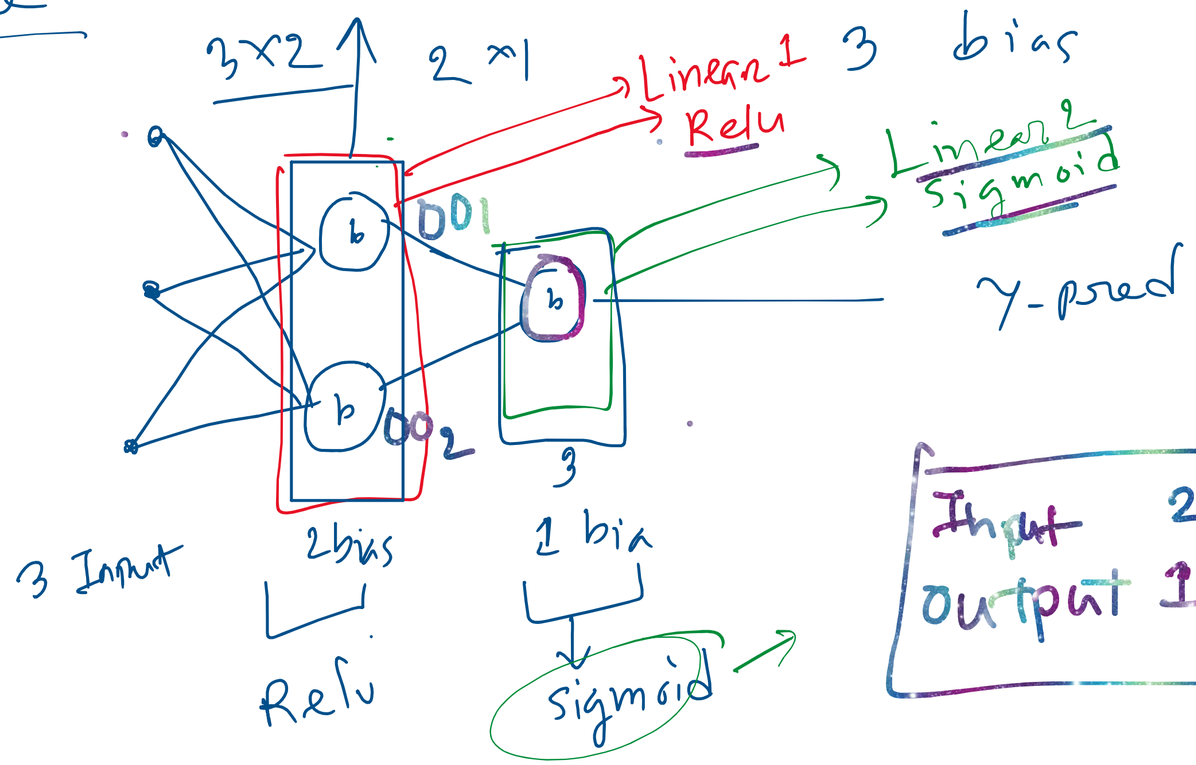


binary classification

More

8 weights

3 bias



Input	2
Output	1

containers → sequantial container
